This is one of a series of reports presenting the findings of the 1933 Census of American Business. The statistics are based on information collected during 1934 in a field canvass with funds provided by the Federal Civil Works Administration.

The reports are prepared under the supervision of Fred A. Gosnell, Chief Statistician, by William A. Ruff, in charge of Service Establishments, Places of Amusement and Hotels, assisted by Ralph C. Janoschka.

SERVICE ESTABLISHMENTS, PLACES OF AMUSEMENT
AND HOTELS: 1933

PLAN OF PRESENTATION

- Volume I.--United States Summary, by Kinds of Business and by States.--Contains explanation of terms and classifications, and summary tables showing for the United States as a whole by kinds of business the data developed by the census; also tables presenting State totals.
- Volume II.--Statistics by States.--Contains explanation of terms and classifications, and tables for each State showing by kinds of business the number of establishments, receipts, proprietors, full-time and part-time employment, payroll, expenses, employment (by months), and sex of employees.
- Volume III.--Statistics for Counties and Cities.--Presents data for counties and cities, by States, for number of establishments, receipts, proprietors, full-time employees, total payroll, and part-time payroll. For each county and city of 2,500 or more inhabitants, totals are shown for three separate groups: Service establishments, places of amusement and hotels. The same data are shown for detailed kind of business classifications for cities of 50,000 inhabitants or over.
- Volume IV.--Hotels: 1933 and 1929.--Compares 1933 and 1929 Census data for hotels with 25 guest rooms and more.

HOTELS

-O-

INTRODUCTION

This report presents in a final form the findings of the second census of hotels, taken as part of the Census of American Business for 1933. Wherever possible, comparisons are provided with the first census of hotels taken in connection with the Census of Distribution for 1929.

The canvass covering the 48 States and the District of Columbia was conducted in the first four months of 1934. The activities of establishments for the calendar year 1933 were reported. Seasonal establishments and new enterprises reported for that part of the year during which they were in active operation.

The canvass was made by enumerators who visited each place of business for the purpose of obtaining the required census report. Separate reports were secured for each place of business, even though two or more establishments were under the same ownership.

GENERAL EXPLANATIONS

SCOPE OF THE REPORT.---This report contains eight basic tables. Those numbered 1, 3, 4, 5, 6 and 7, which present summary statistics for the United States by States for 1933 only, apply to all hotels regardless of size, while Tables 8 and 9, containing comparative data for 1933 and 1929 for States and cities of 250,000 or more inhabitants respectively, are confined to hotels having 25 or more guest rooms. Comparisons with 1929 must be restricted to hotels of this size because the canvass for that year was limited to establishments having 25 or more guest rooms. Table 2, which includes data on hotels for counties and places of 2,500 or more inhabitants, is presented in Volume III of this series of reports, the contents of which are explained in detail in the "Plan of Presentation", given on the second page of this volume.

The data in the majority of tables are presented separately for seasonal and year-round hotels, in view of the dissimilarity in the operations of these types of hotels. In drawing definite conclusions from the tables containing data for all hotels and particularly the tables on seasonal hotels, it should be borne in mind that deficiencies in coverage exist in seasonal establishments. The majority of these hotels were not operating at the time the canvass was made and, for this reason, the enumerator was, in some instances, unable to contact the owner of the establishment for the purpose of securing a report. Although many hotels of the resort type were not in operation in 1933 and were, therefore, legitimately excluded from the 1933 canvass, there is no doubt some degree of understatement in the 1933 figures for seasonal hotels.

Hotels were required, both for 1929 and 1933, to report the plan of operation (European, American, or mixed) on which the establishment was conducted. Although the published data for 1929, and some of the tables for 1933, present hotel statistics classified according to

plan of operation, such classification is considered insufficiently accurate, due to irregularities in reporting, to justify the presentation of comparative data on that basis. While data were published by type of occupancy (transient, permanent, or mixed) for the 1929 census, the data for 1933 are not classified in this manner although an inquiry on type of occupancy was included on the questionnaire.

Information relative to the activities of restaurants not in hotels, or located in hotels but not under hotel management, was collected separately in connection with the census of retail trade. Detailed statistics regarding their operations may be found in the reports on retail trade summarizing the results of the 1933 Census of American Business.

EXPLANATION OF TERMS

HOTELS.---The census includes, in the main, establishments designated under the law of the several States as hotels. It does not cover boarding houses, lodging houses, tourist homes or camps, Y.M.C.A.'s, Y.W.C.A.'s dude ranches, club dormitories and similar establishments which furnish lodging and meals to guests. Hotels operated by Y.M.C.A.'s, or other organizations on a commercial basis are included. So-called apartment hotels are included, provided a substantial part of their receipts are from transient guests. Only establishments whose primary activity is the hotel business are classified as hotels, but hotels operated independently as concessions in connection with other businesses are included in this classification. Each unit of a chain is considered a separate establishment.

YEAR-ROUND HOTELS.---All hotels which are normally in operation at least nine months of the year are included in this classification.

SEASONAL HOTELS.---Hotels which normally operate less than nine months of the year are considered seasonal hotels.

AMERICAN PLAN HOTELS.---Hotels charging a combined fixed rate for rooms and meals are covered by this classification.

EUROPEAN PLAN HOTELS.---This classification includes hotels which make separate charges for rooms and meals.

MIXED PLAN HOTELS (AMERICAN AND EUROPEAN).---Some hotels operate on both the American and European plan and these are classified as "Mixed Plan Hotels."

RECEIPTS.---Receipts represent total revenue of the establishment. A single form of questionnaire was used to canvass hotels, retail stores, wholesale and service establishments, and places of amusement, and each place of business was required to report its receipts in answer to the following questions:

- (a) Receipts from sale of merchandise.
- (b) Receipts from service sales, parking, storage, repairs, cartage, cleaning, etc.

- (c) Receipts from room rentals (hotels, auto camps, etc.).
- (d) Receipts from sale of meals (and from fountain).
- (e) Receipts from admissions (theaters and other places of amusement, athletic contests, dance halls, billiard halls, bowling alleys, etc.).
- (f) Receipts from other sources (specify sources).
- (g) Total net sales or operating receipts (total from "a" to "f").

Although hotels reported receipts as outlined above, Table 5 presenting an analysis of receipts does not show receipts from service sales or admissions. In this table, such receipts are included in "Receipts from other sources." While the questionnaire calls for separate figures on receipts from room rentals and receipts from meal sales, American and mixed plan hotels (particularly the smaller establishments), were usually unable to make this segregation.

In 1929, American and mixed plan hotels did not report separately receipts from room rentals and from meal sales; for this reason, in comparative tables (8 and 9) these receipts are segregated only for European plan hotels. No comparative analysis of receipts is presented for seasonal hotels.

PROPRIETORS.---The enumerators were instructed to include as proprietors all owners of unincorporated establishments and adult members of their families who were actively employed in, and devoting the major part of their time to, the business. Inactive proprietors or partners were not included. Inquiry concerning proprietors did not relate to incorporated establishments. Salaried officers of incorporated companies were considered full-time employees and not proprietors.

FULL-TIME EMPLOYEES.---Employees working a full day each day the establishment is open for business, even if this represents less than a full working week or month, are reported as full-time employees. This principle is followed with reference to each payroll period for which information was obtained. Therefore, persons employed on a full-time basis for only part of the year are regarded as full-time employees for that part of the year. Employees working on a full-time basis in seasonal establishments are also treated as full-time employees.

PART-TIME EMPLOYEES.---Persons employed only a few hours or days of the normal work-week or other payroll period are considered part-time employees. It is possible, however, that this definition was not followed uniformly by all reporting establishments as the average annual wage for part-time employees in some instances appears to be higher than would be justified on the basis of this definition.

AVERAGE NUMBER OF EMPLOYEES (AS COMPUTED FOR ALL HOTELS SEE TABLES 1 AND 3).---The average number of full-time employees for the year represents a total of the reported full-time employment (payroll nearest the 15th of each month) for the twelve months of 1933, divided by twelve. Average part-time employment is computed in the same manner. However, in

drawing conclusions concerning part-time compensation, it should be remembered that part-time employment for the individual employee may vary from one hour to any part of a week which would not normally constitute full-time employment. Employees include salaried officers of corporations, other executives, clerks, and all other employees required to operate a hotel.

AVERAGE NUMBER OF EMPLOYEES (AS COMPUTED FOR HOTELS HAVING 25 OR MORE GUEST ROOMS. SEE TABLES 8 AND 9).---The questionnaire used in connection with the 1929 census called for the total number of all employees (full-time and part-time combined), as of the 15th day or nearest payroll date for the months of April, July, October and December. The average number of employees for the year was arrived at by dividing the total of the reported number of employees for these specific months by four. This same method was also used for computing average number of employees for 1933 in the tables presenting comparative data (1933-1929) for hotels having 25 or more guest rooms. No average number of employees on this basis was computed for seasonal hotels.

SEX OF EMPLOYEES.---A distribution by sex of the combined number of full-time and part-time employees on December 30, 1933, or nearest representative day, was required of each establishment. The ratio resulting from this inquiry was used as a basis for computing the sex distribution of the average number of employees. No sex data are shown in Table 8-A for seasonal hotels containing comparative data (1933-1929), because of the inadequate means of arriving at an average number of employees, as explained in the foregoing paragraph on average number of employees as computed for Tables 8 and 9.

PAYROLL.---Total payroll represents the salaries, wages, commissions and bonuses paid part-time and full-time employees and salaried officers during the year. It does not include compensation of proprietors except the fixed salary of active partners if such salary is paid in addition to the partner's participation in profits. Such salaried partners, found predominantly in large businesses, are comparable to salaried executives of a corporation and are counted as employees rather than proprietors. Payroll figures are not shown in the tables when the total for a given classification is less than \$500.

AVERAGE ANNUAL EARNINGS.---This average is obtained by dividing the full-time payroll by the average number of full-time employees. No average for part-time employees has been computed because the irregularity in the number of days or hours which various part-time employees work makes such an average of doubtful value.

Average annual earnings for classifications having less than ten full-time employees are not shown as the number of employees in such cases is too small to yield a representative average.

TOTAL OPERATING EXPENSES.---Payroll, rent, interest, traveling expenses, advertising, advertising, taxes, insurance, light, heat, power and similar expenses are included in total operating expenses. Cost of merchandise, as distinct from that of materials and supplies, is not included. Since data on total operating expenses were not collected for the 1929 census, information on this subject could not be shown in the comparative tables, (Tables 8 and 9).

GENERAL ANALYSIS

A discussion of the tabular data presented in this report must necessarily be divided into two parts; one relating to statistics for all hotels as canvassed in 1933; the other to the comparison of hotel operations for the years 1933 and 1929, which applies only to those establishments having 25 or more guest rooms.

HOTELS HAVING 25 OR MORE GUEST ROOMS, 1933 AND 1929

YEAR-ROUND HOTELS.---A decrease of 1,234 hotels, or 9 percent, from the total number reported for the United States for 1929 occurred during the four-year period, 1930-1933. The total number of guest rooms decreased by 118,513, or 10 percent of the 1929 total, and total receipts were \$437,820,000 in 1933, as compared with \$962,801,000 in 1929, a decrease of 55 percent. Receipts per guest room averaged \$848 in 1929, and \$431 in 1933, a decrease of 49 percent.

Receipts from room rentals and sale of meals are shown separately only for European plan hotels. Receipts of this kind from American and mixed plan hotels were usually reported as a single item both in 1933 and 1929; they are shown in the column headed "Receipts from rooms and meals." Receipts from room rentals in European plan hotels declined 53 percent in 1933 as compared with 1929; receipts from the sale of meals also decreased 53 percent. In contrast, the receipts from room rentals and sale of meals combined as reported by American plan hotels were 64 percent lower than the 1929 total.

Revenue from other sources, representing principally receipts from the sale of merchandise, service sales, space rentals other than guest rooms, concession rentals, and admissions to ball rooms and other hotel-operated amusements were 49 percent less than receipts of this type reported for 1929.

Employment as reported for the months of July, October and December in 1933 showed a marked increase over the reported employment for April. In that month in 1933, the total employment of year-round hotels was 32 percent below the employment for the same month in 1929. In July, this decrease had declined to 30 percent; in October, to 28 percent; and, by December, it had dropped to 25 percent.

Average employment for the year, based on the reported employment for the four above-mentioned months, was 29 percent less in 1933 than in 1929, in contrast to total payroll which shows a decrease of 49 percent. A comparison of employment by sex shows a considerably greater decline in the number of female employees than in males, 34 percent as against 25 percent.

The number of guest rooms per employee may be regarded as an indication of the relative activity of hotels in one year as compared with another. It is, in a sense, a better measure of activity than revenue or receipts per room, since it is expressed in physical quantity rather than money units and is independent of changes in the value of money. In 1929, the number of guest rooms per employee averaged 3.9, as compared with 4.9 in 1933.

SEASONAL HOTELS.---The number of seasonal hotels reporting in 1933 is 1,289 as compared with 2,249 in 1929. This decrease is due, to a degree, to an incomplete coverage in 1933 as heretofore explained. Guest rooms show a decrease of 77,362 in number, and receipts declined from \$76,562,000 for 1929 to \$19,001,000 for 1933. Total payroll decreased from \$15,-814,000 to \$4,597,000. Employment in seasonal hotels in 1933 shows a decrease of 63 percent in April, as against 66 percent in July, 70 percent in October, and 78 percent in December, compared with the same months for 1929.

HOTELS, 1933

The 1933 census covered all kinds of hotels without regard to the number of guest rooms. Therefore, the tables, which present 1933 data only, relate to all hotels in operation during that year.

The total number of hotels reporting for the year were 29,462, and they gave employment to 269,511 persons, of whom 33,684 are proprietors, 213,919 full-time employees, and 21,908 part-time employees. Their total receipts for the year 1933 are \$515,549,000 and total payroll \$146,280,000, of which \$6,521,000 was paid to part-time employees.

GEOGRAPHIC DISTRIBUTION.---The distribution of the hotel business by States is indicated in Table 1. It is of interest to note that the five States of New York, Illinois, California, Pennsylvania and Ohio reported 47.5 percent of all hotel receipts for 1933. These five States and five others (Massachusetts, New Jersey, Michigan, Texas and Missouri) account for 64.0 percent of all hotel receipts, yet these same States represented in April, 1930, only about one-half of the total population of the country. New York alone reported 17.7 percent of the total hotel business of the country, in contrast to 10 percent of the total population.

EMPLOYMENT, BY MONTHS.---The total number of full-time employees in hotels in 1933--ranged from a minimum of 201,714 in March to a maximum of 233,145 in August. For year round hotels, March was the month of minimum employment and December the maximum; and, for seasonal hotels, November was the minimum, and August, the maximum.

The total number of part-time employees ranged from a low of 19,441 in January to a high of 24,091 in September. For year-round hotels, the minimum employment on a part-time basis was in March, and the maximum in December. Seasonal hotels employed the least number of part-time employees in January and the largest number in September.

HOTELS, CLASSIFIED BY SIZE.---The hotel business in 1933 was concentrated to a high degree in the larger hotels with more than 200 guest rooms. These hotels, although representing only 3.6 percent of all hotels, reported 51.9 percent of total receipts. Hotels with 50 to 199 guest rooms represented 20.4 percent of all hotels and did 29.5 percent of the total business for the year, while hotels with less than 50 guest rooms, comprising 76.0 percent of the total number, reported 18.6 percent of all receipts.

The following table summarizes the number of hotels, number of guest rooms, and receipts, by room-groups:

Hotels, Classified by Number of Guest Rooms

Size Classification	Establishments		Number of guest rooms	Receipts	
	Number	Percent of total		Amount	Percent of total
All Hotels	29,462	100.0	1,361,287	\$515,549,000	100.0
Hotels with---					
500 guest rooms or more.....	151	.5	120,819	119,646,000	23.2
300 to 499 guest rooms.....	344	1.2	129,288	80,105,000	15.5
200 to 299 guest rooms.....	553	1.9	128,118	67,938,000	13.2
100 to 199 guest rooms.....	1,871	6.4	244,969	87,087,000	16.9
50 to 99 guest rooms.....	4,133	14.0	272,432	64,887,000	12.6
Less than 50 guest rooms..	22,410	76.0	465,661	95,886,000	18.6

CHAINS AND INDEPENDENTS.---Although relatively unimportant from the standpoint of number (2.3 percent of the total), hotels operated under chain ownership account for 10 percent of the total volume of business. The term "chain" as used in this report applies to all organizations owning and operating four or more hotels. Hotels operated by organizations with less than four units are classified as independents. The 667 hotels classified as chains had 94,463 guest rooms, an average of 140 for each hotel, as compared with a total of 1,266,844 guest rooms for the 28,795 independently operated hotels, or an average of 44 guest rooms. The average receipts per guest room for chain hotels in 1933 was \$566 as compared with \$365 per guest room for independently operated hotels. The proportion of total hotel business done by chains varies greatly in the several States. Chains reported more than 40 percent of the total hotel business in 2 States, New Mexico and Iowa; more than 20 but less than 30 percent in 3 States, Nebraska, Arizona and Arkansas; 10 to 20 percent in 14 States; and in all other States, less than 10 percent.

DATE OF ESTABLISHMENT.---Hotels are classified in Table 7 by date of establishment into three major groups, those established in or prior to 1929, in 1930-32, and in 1933; hotels which began business in 1933 are divided further to show the number which began business in each quarter of the year. Of the 29,462 hotels reporting for 1933, 25,637 or 87.0 percent, were in operation both in 1929 and 1933; 2,645, or 9.0 percent began business during the years 1930, 1931 or 1932; and 1,180, or 4.0 percent, began business in 1933. These data indicate a much greater degree of stability of operation in the hotel business than is indicated for retail and service establishments which are covered in other reports of the Census of American Business.

1/ Statistics included in year-round hotels.

2/ American plan and Mixed plan (American and European) hotels were not always able to show meal sales separately. Room rentals are therefore overstated, and sale of meals understated to some extent.

SERVICE ESTABLISHMENTS, PLACES OF AMUSEMENT, AND HOTELS: 1933

Census of
American
Business

TABLE 6.—HOTELS—NUMBER OF ESTABLISHMENTS, RECEIPTS, AND EXPENSES, FOR CHAINS
AND INDEPENDENTS, BY GEOGRAPHIC DIVISIONS AND STATES.

(Receipts and expenses expressed in thousands of dollars)

DIVISION AND STATE	Number of Estab- lish- ments	Total Receipts	Total Operating Expenses (Including payroll)	Independents				Chains			
				Number of Estab- lish- ments	Receipts	Percent of Total Receipts	Total Operating Expense (Including payroll)	Number of Estab- lish- ments	Receipts	Percent of Total Receipts	Total Operating Expense (Including payroll)
